

RAW[®]

AUTOMATIC ROLLING BOX

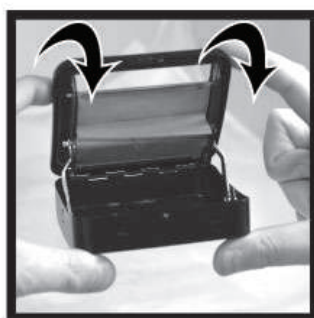

INSTRUCTIONS:

1: Open the box lid and fill the trough of the apron with tobacco. Take care not to fill too much as this can make the machine difficult to operate.

2: Lightly moisten the gummed edge of the paper and place in the trough behind the tobacco. Make sure the gummed edge is facing you and is at the top.

3: Start closing the lid slowly in order to engage the paper. Close the box with slow and continuous pressure on both sides of the lid.

4: A perfectly rolled cigarette will appear through the closed lid - it really is that simple. Remove & Enjoy!
